We say the Legislature ought either to obey the constitutional requirement or else there is any constitutional provision which conflicts with the one we have quoted. But if not, many of the laws passed by our Legislature may be unconstitutional. How for instance can the Legislature pass a bill the title of General Assembly. which implies that it embraces only one object whilst the bill itself shows that it embraces two or more objects? We menion in this connection a bill introduced into the Senate on Thursday at the request of Mr. Lovenstein; and we mention it be cause we know of no objection to its passage if it is constitutional. But is it con-stitutional? Let us imagine the first section of the bill to be as follows:

"Be it enacted, &c., That no law shall em-brace more than one object, which shall be expressed in its title."

Then let us imagine the second section to provide for incorporating a company and authorizing it to prospect for, mine and raise coal, coke, iron, and all other minerals or metallic ores; to prepare same and the products for market, and trans port and sell same; to bore for salt, oil, or atural gas, and manufacture and prepare the same for the market, and sell and dispose thereof; and to construct and la pipe lines, erect furnaces, machinery, and buildings; to lay out their lands, or any part thereof, into parcels or lots, with intervening streets, roads, lanes and alleys, and to build and improve upon the same or to lease out any building thereon; to hold 6,000 acres of land, and run and operate a tramway or railway by horse or steam

Why do wooppose the deportation of the heagens? We might answer that we have never done so, though we have again and again in the last five years attempted to show theimpracticability of the scheme. We have never known any good to result from advocating the scheme. When it is introduced into Congress it exacts the inc of the northern Republicans, and displeases the northern Republicans, and

The State of Thursday has the following in regard to the bill recently introduced into the House of Representatives by Hon.

JOHN A. BUCHANAN, of this State:

"This is the best form of taxation for raising revenue for the Federal Government. It will reach as no other tax can those who while enjoying the benefits and protection of Government for vastly larger properties than those held by others pay little, if any, more taxes. The privileged class will resist such a reform, but the people will triumph in the end. Mr. Buchanan will have the satisfaction some day of knowing that he set on foot a movement that will do more to secure just and equal taxation than any other form of taxing JOHN A. BUCHANAN, of this State: taxation than any other form of taxing known to man."

An income tax exempting five thousand dollars (or seven thousan I dollars, as one bill proposes) will touch the pocket-nerve of comparatively few people, all of whom will of course be able to pay such a tax. There are two objections to sucn a taxnamely, the perjury which it leads unscrupulous rich men to commit in swearing o their incomes and the unfair taxation which results-the conscienceless man paypaying on all his income not exempted by law. ing nothing and the conscientious man

COMPULSORY PILOTAGE. - The Norfolk Landmark's comments upon our little artiale of Thursday concerning compulsory piotage are so candid and so well expressed that we are tempted to reproduce them. We will quote the closing paragraph:

"There is just as much reason that the lots should be protected as there is that snuts, potatoes, or coal should be. In fineiple it is all wrong, but as a matter of actice it exists, and pilot tariff is more fensible than any that we know of."

"The Philadelphia Evening Telegraph does not approve of the plan suzgested by Senator Morgan and other southern leaders' for the radical solution of the negroe problem by the emigration of the negroe to the Congo, and declares that the plan is not practicable for the reason that "all the ships afloat would not suffice to carry off any great part of the negroes in America. And what is more, adds the Telegraph, 'the burth-rate among them is so high that they would increase faster than ships could be built for that purpose.' Continuing, the Telegraph says: 'The negro in America is an ever-present factor, and the sooner these men find it out the better it will be all around.'"

The impracticability of securing ships enough to transport the negroes to Africa grippe, has been frequently pointed out by the Dispaich. That would kill Senator Mosgan's scheme even if there were no other difficulties in its way. Besides as we have fellow.

A thirty-dive horse-power engine drives the machinery, which is ingeniously constructed to grind and mix the clay and to mould, dry, and burn the pipes.

The capacity of the works is from 25,000 to 30,000 pipes a day, and about forty hands are employed in the various departments. Most of the clay comes from this vicinity, but they are now using a clay shipped from near Bristol. Tenn. for the purpose of making a hard or stoneware pipe, as well as the "genuine Fowhstain." The pipes are sent to every part of the country, even to San Francisco and the cities of the Pacific Const.
